CRAFT

About the Platform

Open **API**Sandbox

Accelerate innovation and increase collaboration between 3rd parties and Enterprises by offering production like sandbox environments to minimize complexities and increase API adoption.

Enterprises can now leverage low-cost sandbox, enable 3rd party ecosystems (Fintechs, healthtechs, Edtechs, etc.) to quickly adopt APIs and create ecosystem driven products efficiently using smart transaction sandbox.

Platform

Supports Open Banking
(OBIE, PSD2) & Healthcare
(FHIR) Standards

Open **API**Sandbox

A powerful sandbox platform to

Mitigate Open API Complexities

and deliver innovative products, **Faster!**

Key Features

Craft Great Developer Experience

Offer the best experience to your API ecosystem starting from replicating the actual production environment. The Smart sandbox platform enables rich documentation, interactive training, easy onboarding features to make the overall experience seamless.

Multi-tenant Testing Environment

Set up isolated environments or manage multiple environments for all functions, stakeholders and developers to innovate faster. Hosts an intelligent versioning and environment management feature with extensive consent management module to help cater to all your access related scenarios. Scaling up multiple environments is just a few clicks away.

Self-serving Platform

Completely automate registration, onboarding and third party management. Eliminate complexities and ease usage with extensive know how documents and user guides to make adoption effortless. Offers enhanced capabilities to test own data and help accelerate implementation.

Smart, Transactional & Data driven

Leverage a fully transactional Open APISandbox platform with smart analytics and reports engine. Easily simulate, manage and customize errors at business level. Enterprises can make the most of try out sequencing, advance data logics and performance simulation to achieve product perfection. Includes a fully integrated business rules manager to meet business requirements.

Robust, Portable & Scalable

Open APISandbox platform leverages cutting-edge technology to offer the highest range of portability for enterprises to either deploy your sandbox locally or on any cloud. Offers the flexibility and robustness to spin up new sandboxes on demand so test multiple versions of APIs at the same time. Sandbox platform will be built to support multiple API Gateway and helps easily scale the number of sandboxes needed.

Supports Open Banking (OBIE, PSD2)

Fully compliant with all the leading open banking standards. Supports Open Banking (V3.1.1 to V3.1.6) and PSD2(Berlin Standard) to name a few. Enables banks to focus on product innovation and minimizing complexities with each regulatory update.

Supports Healthcare (FHIR) Standards

Our sandbox simplifies and accelerates healthcare data interoperability with pre-built SMART on FHIR APIs. Healthcare organizations can now increase API security and enhance data protection with ease. The sandbox supports multiple FHIR versions like DSTU2 (1.0.2), STU3 (3.0.1) and R4 (4.0.1).

About DigitalAPICraft

DigitalAPICraft, through its products and services, helps global brands establish their API Ecosystem and transform into a truly Experience Enterprise. As a leading end-to-end digital transformation partner, our API-led approach enables retail, banking, insurance, telecom, and media companies to offer delightful customer experience, transform business processes and boost operational efficiency.

DigitalAPICraft has been awarded “Delivery Partner of the Year for APAC 2017 – Google Cloud” and is a Premier Google-Apigee partner. Over three consecutive years (2020, 2019 & 2018), DigitalAPICraft is recognized as one of the fastest-growing technology companies by Deloitte in its Technology Fast 50 India and twice (2019 & 2018) in Technology Fast 500 Asia Pacific rankings.

Located in USA, UK and India, and with customers across the globe, DigitalAPICraft brings extensive product and platform experience to help enterprises with digital strategy and consulting, disruption engineering, end-to-end DevOps, experience engineering and much more.
